

PLANE

design Massimo Mariani

Table made of two tempered glass panels, 120x120cm with 12mm thickness, with rounded corners and beveled edge. The lower glass panel has three through holes, two of which house the pins to insert the marble or wooden slab. The third hole houses another pin to support the upper glass panel, to which is fixed, with a UV-cured adhesive, a small plate with a conical counterbore to align with the pin itself. Finishes of the insert: slab of marble white Carrara,

black Marquinia, red Levanto or Sahara Noir or in plywood veneered with 2mm plates and edged with 4mm solid "Canaletto" walnut or Stone Oak®. All versions are finished with a slip proof transparent matt varnish on the upper surface. Stainless Steel AISI 304 feet fixed to the glass panel through a UV-cured adhesive, paired with black plastic tips.

Notes

Stone Oak®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high quality product; any differences in color should not be considered as defects.
