

## Eryt

**ARMCHAIRS** 

2023

Piero Lissoni

## Description

Nodding to 1950s Nordic design and to elements of Japanese culture, Eryt is the new armchair by Piero Lissoni. With a strong graphic and welcoming presence, the ash structure recalls Nordic rigor and an oriental spirit through a linear combination of materials but with refined touches. The turned solid wooden frame is made of ash topped with a curved plywood backrest and seat. The armchair is available entirely in wood or with the seat covered in thick leather and can be complemented with a soft elliptical cushion upholstered in fabric or leather. Eryt's design is reduced to a minimum to meet technical requirements, guarantee a lightweight aesthetic, and provide comfort.
