DESCRIPTION

Fine gradation is the essence of the features in this table structure, which seems to be made from a single fine pencil stroke combined with exceptional wood processing craftsmanship. The table surface is accentuated thanks to wood structure lines. Softly processed edges make texture lines descend like waterfalls, rounding the edges or continuing their way down, transitioning into the load-bearing elements, the table's legs. Set at an angle, they underline the continuity of the flow and overall elegance. The surface thus transitions into lines getting thinner and thinner to the point of union with the floor. The steady and elegant structure results from a skilled harmonisation of aesthetic values of the raw material and a deliberate design, creating the impression of flying and enhancing space.

PRODUCTION PROCESS

Tables are crafted from carefully selected, high-quality solid wood, chosen for its durability and distinctive natural grain. Each piece of wood is precisely cut and shaped to achieve clean lines and balanced proportions. Skilled artisans meticulously assemble the components using traditional joinery techniques, ensuring lasting strength and stability. Surfaces are finely sanded to enhance the wood's texture and prepare it for finishing. The final stage involves applying a chosen finish - whether natural oil, wax, or another treatment - to protect the wood and highlight its organic beauty. The result is a versatile, handcrafted table that seamlessly blends functionality with timeless design.
